Notice to Residents

The Town of Wabana wishes to apologize to residents for the water quality issues currently being experienced.

The Town wishes to advise residents that we will be servicing the water system from January 3rd to the 20th and that residents may experience periods of water outages, low water pressure, and/or discolouration of their water.

The Town is experiencing a water shortage and we ask residents to not 'run' their water, to conserve water, and to report any possible system leaks immediately.

Please be advised that we continue to be on a boil water order.

We thank you for your patience.

Town of Wabana
